Scone/Aberdeen Water Supply Augmentation – Design and Construction of 0.5ML Balance Tank

Contract Value: \$1,045,000

Final Value: \$1,038,000

Client: Upper Hunter Shire Council

The construction of the a 0.5ML Balance Tank at Brushy Hill was a component of the \$30,000,000 Scone/Aberdeen Water Supply Augmentation project completed in 2012.

The project brief was for the design and construction of a 0.5ML Balance Tank including all necessary access road, inlet and outlet pipework, overflows, tank access and emergency evacuation mechanisms, roof structure and solar powered instrumentation and telemetry.

The design was completed by Snowy Mountains Engineering Company and construction was completed in June 2012, approximately 4 weeks ahead of schedule.

A number of challenges were encountered on the project including high strength rock, liaison with adjoining landholders and stock control.
