

RECENT PROJECTS

Construction of Sewage Pump Station G8 and Retention Tank

Contract Value: \$996,000

Final Value: \$1,020,000

Client: Central Coast Council

Client Contact: Steve Davis

Works involved construction of a new 3.0m wet well, valve pit, electrical switchboard plinth, emergency sewage retention tank, driveway, civil works and a new PE100 315PE rising main.

The existing SPS G8 station was decommissioned and demolished after the commissioning of the New SPS G8 Station.

The pump station was located behind the Gosford Golf Club so close coordination with players and general traffic was required. A major upgrade to the Gosford Hospital was also underway at the time of construction which caused additional parking volumes in the golf club car park.

The project was completed on time in July, 2016.
