## Kincumber STP – Sludge Thickener Upgrade

Contract Value: \$740,000

Final Value: \$820,000

Client: Central Coast Council

Client Contact: Amanda Cashion

Works included the design and construction of the sludge thickening facility at Kincumber STP including the following:

- Construction of the new sludge thickening structural concrete facility adjacent to the existing DAF thickening unit
- Design, supply and installation of two (2) new gravity drainage decks to facilitate sludge thickening
- Design, supply, installation, testing and commissioning of a new polymer dosing facility
- Installation of new pipework, valves, flowmeters and instrumentation as required to complete a fully functioning facility

This contract was conducted in an operating sewage treatment plant and also included coordination with other contractors on site as well as CCC staff.
