

RECENT PROJECTS

Peats Ridge ZS 2x 5MW BESS Civil Works

Contract Value: \$2,008,000

Final Value: \$2,128,972

Client: Plus ES

Client Contact: Marc Hamilton

Works involved many civil and structural activities including excavation, footing and pile construction, pavement upgrades, stormwater installations, and formation of new access and hardstand areas. Key structural elements included new piles, slabs, footings, containment pits, acoustic walls, lighting pole bases and upgrades to existing roadway infrastructure.

Works also included installation of hydraulic services such as water mains, hydrants, pipework, and associated infrastructure, alongside construction of oil containment systems and multiple stormwater and drainage components. Electrical works include installation of the site earth grid, copper earthing conductors, conduits, crushed rock bedding, and associated terminations.

The project was completed in November, 2025.
