

# RECENT PROJECTS

## Taree Pump Station TA-SPS-06

**Contract Value:** \$321,000

**Final Value:** \$432,650

**Client:** Midcoast Council

**Client Contact:** David Goodwin

Construction works included site preparation, conduit installation, and earthworks for retaining wall footings, followed by the construction and backfilling of blockwork retaining walls.

A new brick wall was installed within the existing switchroom to create an additional room, and handrails were adjusted to suit a new doorway. Additional works involved installing a new steel stair access, creating a new door opening in an existing brick wall, and fitting new double doors.

The project was completed on time in November 2024.
