

RECENT PROJECTS

Terrigal Drive, Sewer Pump Station Refurbishment

Contract Value: \$900,000.00

Final Value: \$902,475.00

Client: Homes NSW (NSW Land & Housing Corporation)

Client Contact: Ashish Solanki

Gongues were awarded this project in March 2026. This site had been problematic for our client for several years with repeated breakdowns and pump blockages.

Upgrade works included:

- Implementation of a bypass to allow the works to be undertaken
- Installation of a new 5kL poly emergency storage tank
- Construction of a new valve pit
- Remediation of existing concrete structures including Polibrid coatings
- Construction of new 125mm HDPE rising main to replace the existing 50mm main
- Installation of 2x Flygt Concertor Smart Pumps including guide rails, lifting chains etc.
- Installation of new pipework, valves
- Installation and commissioning of a new switchboard & control panel
- Access covers and handrails

The project was successfully commissioned in July 2026 and has been operating successfully, alleviating environmental concerns that existed with the old system.
